**SOLID BRIEF**
Speedo’s PowerFLEX Eco is an innovative and earth-friendly fabric that is made using Econyl, a nylon yarn that is 100% regenerated from other nylon products at the end of their lifecycle. Speedo has partnered with Aquafil, Econyl’s parent company, to create a program that regenerates all the waste scraps that are left over from our PowerFLEX Eco suit production. To date, we’ve prevented around one ton of Econyl scrap from going into a landfill or being incinerated.

A little less waste in the world is good for us all.

**PowerFLEX Eco**

3X more compressive than PowerFLEX

Made from 100% pre and post consumer waste nylon yarn.

30% more resistant for fiber breakage in chlorine compared to PowerFLEX
